

Simplify Operations, Reduce Risk and Drive Profit

Domino's Pizza operates a network of more than 5,000 franchised and company owned stores nationwide. They face many challenges dealing with disparate providers, increasing cost and having multiple invoices to process. Further more, they also experienced frequent downtime because of outages.

FREQUENT OUTAGES COMPROMISED CUSTOMER LOYALTY

Any downtime can hit profits hard. Frequent outages can lead to lost opportunities and compromised customer loyalty. One franchise owner experienced three days of downtime costing him a whopping \$20,000 in lost revenue.

PROBLEM SOLVED

Up-to-the minute email alerts keep you informed on the health of your network. Proactive network monitoring minimizes and eliminates downtime before it occurs.

RISING RATES EQUAL HIGHER BILLS

The cost of copper continues to escalate, leading to higher rates and bills. In addition, muddling through stacks of invoices from different providers is a drain on time and employee resources and takes away from the business of selling pizza.

PROBLEM SOLVED

A flat per-location rate takes the work out of monthly bill processing. With one consolidated bill to review for ALL locations, employee resources can now be deployed to revenue-generating areas of the business.

"Running multiple locations means I'm on the road moving from location to location attending meetings. I like knowing I have one number on speed dial with a live person there to help me on the spot with my service issues."
– Domino's Franchise Owner

MULTIPLE PROVIDERS CAUSED CONFUSION AND LEAD TO LONGER ON-HOLD TIMES

Having multiple providers means having multiple phone numbers to dial and different people to contact for support, not to mention longer on hold times for service and support. When you're a franchise owner who's always on the road, your contact lists may not be at your fingertips.

PROBLEM SOLVED

A single accountable partner delivers immediate response to service requests. Plus, you only have one number to call for all your needs.

HARDWARE WAS NOT STANDARDIZED

When your business is making profit from pizza, managing phone and Internet should not be something you struggle with.

PROBLEM SOLVED

A "Done for You" solution means that BullsEye professionally installs and deploys this VoIP solution. Owners don't need to plug and pray that the solution works.

Fully managed and professionally installed "done for you solution."

EXAMPLE OF FRANCHISE SOLUTIONS:

Bundle 1

- 3 VoIP Seats
- 2 POTs Lines
- 1 Data Circuit

Bundle 2

- 4 VoIP Seats
- 3 POTs Lines
- 1 Data Circuit

Bundle 3

- 16 VoIP Seats
- 2 POTs Lines
- 1 Data Circuit

Have a configuration and budget in mind? We'll meet your needs. Choose from: VoIP seats, POTS lines and Data Circuits.
